****Chambers had planned to respond to criticisms of his work by publishing a series of letters to the 'Times' followed by a pamphlet of a hundred or so pages, however Churchill convinced the anonymous author (through his friend Alexander Ireland) that it should be issued in book form, printed and bound similarly to the original. This was duly issued in 1845, and was followed by this slightly altered version in 1846. By then the fifth edition of 'Vestiges' was ready and the two works were often reviewed together, the publisher going so far as to suggest a combined volume, however his anonymous author pointed out that the arguments were already incorporated in the new edition. #66864 A\$650.00*

60 [Marra, John]. **JOURNAL OF THE RESOLUTION'S VOYAGE**, In 1772, 1773, 1774, and 1775. On Discovery to the Southern Hemisphere, by which the Non-Existence of an undiscovered Continent, between the Equator and the 50th Degree of Southern Latitude, is demonstratively proved. Also a Journal of the Adventure's Voyage, in the Years 1772, 1773, and 1774. With an Account of the Separation of the two Ships, and the most remarkable Incidents that befel each. Interspersed with Historical and Geographical Descriptions of the Islands and Countries discovered in the Course of their respective Voyages. Illustrated with a Chart, in which the Tracks of both Vessels are accurately laid down, and other Cuts. [Edited by D. Henry]. London: Printed for F. Newbery, at the Corner of St. Paul's Church-Yard. 1775. Facsimile Edition; pp. [ii], xiv, 328, [2](blank); long folding chart, 5 plates; original imitation vellum; a fine copy; scarce. Amsterdam; N. Israel; 1967. ****Bibliotheca Australiana* No. 15. This was the first published book to contain an account of the Antarctic regions based on actual knowledge. The track chart shows the three points of penetration of the Antarctic circle by the Resolution (the first accompanied by the Adventure - shortly afterwards the ships experienced great difficulty in keeping company due to the icy conditions, and were soon separated by a severe storm) and includes on the third occasion the notation "land seen" although the narrative makes it clear that this was by no means certain. Correspondence between Cook and the Admiralty indicates that the author was the Irishman, John Marra, whom Cook had picked up at Batavia on the Endeavour voyage, and who was gunner's mate on the Resolution. The work was edited by David Henry, editor and a voluminous contributor to the "Gentleman's Magazine" for many years, and author/editor of "An Historical Account of all the Voyages round the World", published in 4 volumes in 1773-4, to which in 1775 was added a fifth volume containing the Resolution voyage (i.e. the present account), and in 1786 a sixth, with an account of Cook's third voyage (Rickman's account). Hocken notes that "The preface discloses considerable knowledge of private matters connected with the voyage, and gives an account of the causes which led Mr. Banks and his staff to withdraw in high dudgeon from the expedition at the last moment." The publication of Marra's work preceded Cook's Official Account by at least 18 months.
